Q54 stage 2: strongest ordinary methods retained; no new acquisition capability
A. Sequential stopping improves constants
Probability of having stopped
Scalar readings (same endpoint/noise)
Ordinary SPRT sample-count CDF
Fixed-n 5% threshold: 177
SPRT mean: 91.9
B. Sharp compatible-law target intervals
Five analytic families; 17 safe readings each
Force at withheld displacement b=1
200 cases, ordered by target truth
Withheld target truth
C. Exact certificate = ordinary LP
800 tasks; zero observed incorrect certificates
402 unresolved tasks retained
Force-ceiling task decisions
297
101
402
Below ceiling
Above ceiling
UNKNOWN
