Loss-clock identities and finite process checks
One slow mode remains
Normalized loss time $\tau\|L\|^2$
Computed clock mass $W(\tau)$
Proved bound $18KM = 72$
Dimensionless source parameter
Fast scale R
CDF circuit resolves time in bits
43 bits address 8.8 trillion cells
with 43 coherent prefix levels
Bits / coherent prefix levels
Fast scale R
Noncommuting intermediate control
Source-derived retained process
Resetting bath: Choi distance
Finite channel error diagnostic
Quadrature refinement
