Bounded metric filtering and the weighted physical loss clock
Coupling grows as square root of rate
Dimensionless source parameter
Relaxation multiplier
Computed envelope mass
Proved bound 5KM = 20
Complete source normalizer
Large constants remain visible
Sufficient maximum duration
Relaxation multiplier
Old sufficient Dyson window
New sufficient activity window
Refinement at multiplier 1,000,000
Finite operator error
CPU quadrature resolution
Complete source Gram error
Physical jump convolution error
